TRW Steering Systems Sp. z o.o. recommends Wamech as a professional business partner.

Our companies have been cooperating since 2005 and during that time Wamech has delivered several dozen transport platforms, KLT trolleys and complete E-Liner intralogistic system.

We have found Wamech company as a professional manufacturer of intralogistics systems, both in terms of dedicated solutions design and their implementation. Orders are executed reliably and on time and supplied products are of very high quality. Mechanical solutions used in platforms and trolleys make them really durable and almost fully eliminate costs of maintenance and repairs. The use of Wamech systems significantly influenced on the improvement of our production plant's internal logistics.

Due to the fact of successful cooperation so far we will certainly use the Wamech's company services in the future.
