REFERENCES

Cooperation with Wamech company started in 2000 and since then we have been continuously collaborating in scope of design, production and delivery of dedicated intralogistic devices such as trolleys and platforms.

During the whole time of cooperation between our companies products have been delivered on time and their quality were exceptional. Fully mechanical construction of platforms and trolleys allows them to be very reliable in harsh production environment. Thanks to use of Wamech's intralogistics systems we were able to lower the costs of exploitation and services. We have also found products offered as very safe and significantly increasing the ergonomic of our employees' work.

Foregoing experience can allow us to state that we will surely continue the cooperation with Wamech and we can recommend the company as a professional intralogistics systems designer and producer.
